

POLS201 Spring 2019

Midterm Review and Dplyr Introduction

March 4

Today's Agenda

POLS201
Spring 2019

- Review for the midterm.
 - I plan to be here tomorrow evening at 6 for Q&A
- Introduce a free Datacamp Course on survey design.
- If time permits:
- Review the R Dplyr package and the key terms
 - Show you one useful link that demonstrates it.

Midterm Handout

POLS201
Spring 2019

Dplyr terms

POLS201
Spring 2019

- R is a collection of objects and functions
- DPLYR is a collection of functions (“verbs”) that modify and extend data frames.
- The most important verbs are:
 - select, filter, arrange, rename, case_when, group_by, summarize, and count.
- You can store your results in a new dataframe or overwrite the original dataframe (aka “tibble”)
- Or just display the results.
